

CUSTOM BUILD PC MANUAL

Tailored Assembly & Component Integration

PANEL 1: CORE WORKFLOW

- Component Matching: Verification of CPU socket, RAM generation, and power budget compatibility.
- Precision Assembly: Grounded seating of the processor, modular power supply wiring, and GPU mapping.
- Cable Routing: Managing power and data lines behind the tray to maximize internal cooling airflow.

PANEL 2: SCHEMATIC MAP

PANEL 3: VALIDATION LOG

- ☐ Confirm that the motherboard standoffs are properly aligned.
- ☐ Ensure the GPU latch is fully clicked and locked into place.
- ☐ Check that all modular power supply cables are latched.
